Table of Contents

1 Preface

1.1 Preface 6

2 Safety

2.1 Important provisions for electronic products 7
2.2 Intended use of electronic products 8
2.3 Personnel and organizational requirements 9
2.4 Safety regulations for commissioning and operation of electronic products 10
2.5 Safety regulations for assembly, maintenance, and repair work on electronic products 11
2.6 Fire and environmental protection, consumables and auxiliary materials for electronic products 13
2.7 Standards for warning messages in the text and highlighted information 14

3 Functional Description

3.1 Product Summary 15
3.1.1 System – Overview 15
3.1.2 Subsystems – Purpose 18
3.1.3 Numbering convention for multiple-engine plants 19

3.2 Subsystems on the Control Stand 21
3.2.1 System Bus Components 21
3.2.1.1 Systembus Coupling Unit SCU – Purpose 21
3.2.1.2 Ethernet switch SMCS 8GT – Purpose 22
3.2.2 Monitoring and Control System MCS-6 23
3.2.2.1 MCS-6 – Overview 23
3.2.2.2 MCS-6 – Purpose of the devices 25
3.2.2.3 MCS-6 – Main control stand and slave control stands 32
3.2.3 Remote Control System RCS-6 35
3.2.3.1 RCS-6 – Overview 35
3.2.3.2 RCS-6 – Purpose of the units 36
3.2.3.3 RCS-6 – Main control stand and slave control stands 42

3.3 Subsystems in the Engine Room 48
3.3.1 Central Processing Unit of the Subsystems 48
3.3.1.1 Local Operating Panel LOP 14 – Signal paths 48
3.3.1.2 Local Operating Panel LOP 14 – Purpose 52
3.3.2 Engine Control System ECS-6 54
3.3.2.1 ECS-6 – Overview 54
3.3.2.2 ECS-6 – Purpose of the units 55
3.3.2.3 ECS -6 – Interaction of devices and signal paths 59
3.3.3 Indicators and Controls (Optional) 60
3.3.3.1 Priming Pump Controller PPC – Purpose and functions 60

3.4 Technical Data 61
3.4.1 Local operating panel LOP – Technical data 61
3.4.2 Technical data of control panel PAN 9 62
3.4.3 Display MFD – Technical data 63
3.4.4 Display MTD2 – Technical data 65
3.4.5 ECU 7 – Technical data 67
3.4.6 ECU 9 – Technical data 69
3.4.7 EMU 8 – Technical data 71
3.4.8 EIM 2 and 6 – Technical data 72
3.4.9 PPC – Technical data 73
3.4.10 ROS 13-01- Technical data 74
3.4.11 ROS 13-02 - Technical data 75
3.4.12 ROS 15 - Technical data 76
3.4.13 ROS 16 - Technical data 77
3.4.14 Systembus Coupling Unit SCU – Technical data 78
3.4.15 Ethernet switch SMCS 8GT – Technical data 79
3.4.16 EXU – Technical data 80

4 Operating Instructions

4.1 Indicators and Controls on the Control Stand 83
4.1.1 System Bus Components 83
4.1.1.1 Systembus Coupling Unit SCU – Design 83
4.1.1.2 Ethernet switch SMCS 8GT – Indicators 87
4.1.2 Monitoring and Control System MCS-6 89
4.1.2.1 MCS-6 – Indicators and controls 89
4.1.2.2 MCS-6 – Main control stand and slave control stands 92
4.1.2.3 Control panel DIM-PAN – Controls and indicators 95
4.1.2.4 Control panel Alarm group PAN – Controls and indicators 96
4.1.2.5 Control panel Start/Stop PAN – Indicators and controls 98
4.1.2.6 Display MFD – Display and controls 101
4.1.2.7 Multitouch Display MTD2 – Display and controls 103
4.1.2.8 Display MFD – Overview of screen pages 105
4.1.2.9 Multitouch Display MTD2 – Overview of screen pages 112
4.1.3 Remote Control System RCS-6 138
4.1.3.1 Control panel RCS display PAN – Controls and indicators 138

DCL-ID: 0000022886 - 015

4.1.3.2 Control panel RCS Transfer PAN – Controls and indicators 141
4.1.3.3 Command unit ROS 15 for one shaft 144
4.1.3.4 Command unit ROS 13 for two shafts 146
4.1.3.5 Command unit ROS 16 for three shafts 148
4.1.3.6 Command unit ROS 13 for four shafts 152

4.2 Operation at the Control Stand 154
4.2.1 Switching the Overall System On and Off 154
4.2.1.1 Switching on the overall system, without key switch 154
4.2.1.2 Switching on the overall system with key switch (optional) 155
4.2.1.3 Switching off the overall system, without key switch 156
4.2.1.4 Switching off the overall system, with key switch (optional) 157
4.2.2 Operation at the Start/Stop PAN (non-hybrid systems only) 158
4.2.2.1 Engine – Start procedure 158
4.2.2.2 Override – Activation 159
4.2.2.3 Override function – Deactivation 160
4.2.2.4 Engine – Shutdown 161
4.2.2.5 Engine – Emergency shutdown 162
4.2.3 Operation with Command Units (All Variants) 163
4.2.3.1 Assuming initial command 163
4.2.3.2 Transferring command 164
4.2.3.3 Operation (non-hybrid systems only) 166
4.2.3.4 Crash Stop maneuver (non-hybrid systems only) 167
4.2.3.5 RCS propulsion modes (non-hybrid systems only) 168
4.2.3.6 RCS propulsion modes – Additional functions (AUX) (non-hybrid systems only) 169
4.2.3.7 Cruising mode (CRS) 170
4.2.3.8 Smart Cruise mode (SCRS) 172
4.2.3.9 Trolling mode (TRL) 176
4.2.3.10 Docking mode 178
4.2.3.11 Smart Speed Adjust (SSA) 179
4.2.3.12 High Idle 180
4.2.3.13 Warm-up mode – Engine speed adjustment without engagement 181
4.2.3.14 Warm-up mode deactivation – Engine speed change without engagement 182
4.2.3.15 Synchronization mode (SCL and SMART SYNC) 183
4.2.3.16 SCL synchronization (Single Control Lever) mode – Activation 184
4.2.3.17 SCL synchronization mode (Single Control Lever mode) – Deactivation 185
4.2.3.18 Synchronization mode (SMART SYNC) – Activation 186
4.2.3.19 Synchronization mode (SMART SYNC) – Deactivation 187

4.3 Indicators and Controls in the Engine Room 188
4.3.1 Local Operating Panel LOP 14 – Controls and displays 188
4.3.2 Display on LOP 14 – General screen pages, navigation and function keys 191
4.3.3 Display on LOP 14 – Screen pages, diesel engine 205
4.3.4 Display on LOP 14 – Screen pages, gas engine 217
4.3.5 Indicators and Controls (Optional) 226
4.3.5.1 Priming Pump Controller PPC – Controls and indicators 226

4.4 Operation in the Engine Room 227
4.4.1 Operation at Local Operating Panel LOP 14 227
4.4.1.1 Engine – Switching ready for operation 227
4.4.1.2 Local mode – Activation 228
4.4.1.3 Local mode – Engine start procedure 229
4.4.1.4 Local mode – Engine start procedure (with optional PPC) 230
4.4.1.5 Local mode – Gearbox engagement/ disengagement 232
4.4.1.6 Local mode – Changing engine speed 234
4.4.1.7 Engine – Stopping procedure 235
4.4.1.8 Local mode – Deactivation 236
4.4.1.9 Engine start – interlock (manual start interlock) 237
4.4.1.10 Engine – Emergency stop 238
4.4.1.11 Manual exhaust gas emission changeover (Option) 239

4.5 Troubleshooting 240
4.5.1 System faults 240
4.5.2 Troubleshooting 246
4.5.3 Troubleshooting – Control panel PAN 9 250
4.5.4 Fault indication on the service display of Local Operating Panel LOP 251
4.5.5 Display of emission-relevant alarms on the service display 255

5 Workshop Manual

5.1 Operating Tests 256
5.1.1 Test overspeed 256
5.1.2 Emergency stop test 257
5.1.3 Indicators and Controls (Optional) 258
5.1.3.1 Emergency stop test 258
5.1.4 Engine – Cranking 259
5.1.5 Lamp test 260

5.2 Checks and Settings 261
5.2.1 Engine cabling – Check 261
5.2.2 MFD display settings – Check 262

DCL-ID: 0000022886 - 015

5.2.3 MFD display – Settings 263
5.2.4 Display MTD2 – Setting 266
5.2.5 LOP control panel settings – Check 269
5.2.6 LOP display DIS – Setting 271
5.2.7 PAN 9 control panel settings – Check 273
5.2.8 Control panel PAN 9 – Settings 274
5.2.9 Local Operating Panel LOP 14 configuration – Check 276
5.2.10 Local Operating Panel LOP 14 configuration – Setting 278
5.2.11 Jumper configuration of LOP – Check 283
5.2.12 Configuration of Systembus Coupling Unit SCU – Check 286
5.2.13 Systembus Coupling Unit SCU – Setting 287
5.2.14 Indicators and Controls (Optional) 288
5.2.14.1 Oil priming pump control unit PPC – Check function 288

5.3 Repair Work 289
5.3.1 ROS command unit – Replacement 289
5.3.2 Analog display instrument – Replacement 290
5.3.3 MFD display – Replacement 291
5.3.4 Display MTD2/MTD3 – Replacement 293
5.3.5 Battery on MFD display – Replacement 295
5.3.6 Battery in display MTD2/MTD3 – Replacement 296
5.3.7 SD card on MFD display – Replacement 297
5.3.8 SD card in MTD2/MTD3 display – Replacement 298
5.3.9 Control panel locking device – Replacement 299
5.3.10 Control panel cover cap – Replacement 301
5.3.11 Front panel with labels – Replacement 302
5.3.12 Control panel PAN 9 – Replacement 304
5.3.13 Battery on Local Operating Panel – Replacement 305
5.3.14 SD card on Local Operating Panel LOP 14 – Replacement 308
5.3.15 Fuse on Local Operating Panel LOP 14 – Replacement 311
5.3.16 Cable entry plate on Local Operating Panel LOP 14 – Replacement 314
5.3.17 Local Operating Panel LOP 14 front panel LOS 4 – Replacement 316
5.3.18 MEM in front panel of LOS 4 of LOP 14 – Installation 318
5.3.19 Local Operating Panel LOP housing frame – Replacement 319
5.3.20 Systembus Processing Unit SPU on Local Operating Panel LOP 14 – Replacement 321
5.3.21 Systembus Coupling Unit SCU – Replacement 323
5.3.22 CAN node BlueVision_Advanced | NewGeneration – Configuration 324
5.3.23 Local Operating Panel LOP 14 – Replacement 326
5.3.24 Indicators and Controls (Optional) 330
5.3.24.1 Priming Pump Controller PPC – Replacement 330
5.3.24.2 Priming Pump Controller PPC – Repair 331

5.4 Supplementary Technical Information 333
5.4.1 Local Operating Panel LOP 14 – Design 333
5.4.2 Web function of Local Operating Panel LOP 339
5.4.3 Indicators and Controls (Optional) 340
5.4.3.1 Priming pump control unit PPC design 340

6 Preparation for Putting into Operation after Extended Out-of-Service Periods

6.1 Putting into operation after extended out-of-service periods 341
6.2 Engine – Start procedure at MCS after extended out-of-service periods 342
6.3 Engine – Start procedure at Local Operating Panel LOP 14 after extended out-of-service periods 344

1 Preface

1.1 Preface

This manual provides instructions for your product from the manufacturer Rolls-Royce Solutions.

TIM-ID: 0000088480 - 004

2 Safety

2.1 Important provisions for electronic products

General

This product may pose a risk of injury or damage in the following cases:

- Incorrect use
- Operation, maintenance and repair by unqualified personnel
- Assembly, maintenance, and repair without ESD („Electro Static Discharge“) equipment and ESD work station
- Changes or modifications which are neither made nor authorized by the manufacturer
- Noncompliance with the safety instructions and warning notices

Nameplates

The product is identified by nameplate, model designation or serial number. This data must match the specifications in these instructions.

Nameplates, model designation or serial number can be found on the product.

TIM-ID: 0000094290 - 001

2.2 Intended use of electronic products

Intended use

The product is intended for use in accordance with its contractually-defined purpose as described in the relevant technical documents only.

Intended use entails operation:
- Within the permissible operating parameters in accordance with the (→ Technical data)
- With spare parts approved by the manufacturer in accordance with the (→ Spare Parts Catalog/Rolls-Royce Solutions contact/Service partner)
- In the original configuration of the delivery or in a configuration approved in writing by the manufacturer
- In compliance with all safety regulations and in adherence with all safety and warning notices in this manual
- Work which requires communication with the control units must only be carried out with a diagnosis software or with tools approved by the manufacturer.
- In compliance with the maintenance and repair instructions contained in this manual, in particular with regard to the specified tightening torques
- With the exclusive use of technical personnel trained in commissioning, operation, maintenance and repair

Any other use, particularly misuse, is considered as being contrary to the intended purpose. Such improper use increases the risk of injury and damage when working with the product. The manufacturer shall not be held liable for any damage resulting from improper, non-intended use.

The specifications of the manufacturer will be amended or supplemented as necessary. Prior to operation, make sure that the latest version is used. The latest version can be found at:
- http://www.mtu-solutions.com

Modifications or conversions

Unauthorized changes to the product represent a contravention of its intended use and compromise safety.

Changes or modifications shall only be considered to comply with the intended use when expressly authorized by the manufacturer. The manufacturer shall not be held liable for any damage resulting from unauthorized changes or modifications.

TIM-ID: 0000094292 - 002

2.3 Personnel and organizational requirements

Organizational measures of the user/manufacturer

This manual must be issued to all personnel involved in operation, maintenance, repair, assembly, installation, or transportation.

Keep this manual handy in the vicinity of the product such that it is accessible to operating, maintenance, repair, assembly, installation, and transport personnel at all times.

Personnel must receive instruction on product handling and repair based on this manual. In particular, personnel must have read and understood the safety requirements and warnings before starting work.

This is important in the case of personnel who only occasionally perform work on or around the product. Such personnel must be instructed repeatedly.

Personnel requirements

All work on the product must be carried out by trained, instructed and qualified personnel only:

- Training at the Training Center of the manufacturer
- Qualified personnel from the areas mechanical engineering, plant construction, and electrical engineering and also for work with live parts

The operator must define the responsibilities of the personnel involved in operation, maintenance, repair, assembly, installation, and transport in writing.

Personnel shall not report for duty under the influence of alcohol, drugs or strong medication.

Clothing and personal protective equipment

Always wear appropriate personal protective equipment, e.g. safety shoes, ear protectors, protective gloves, goggles, breathing mask. Follow the instructions concerning personal protective equipment in the respective descriptions of the individual activities or the manufacturer's documentation included in the delivery.

When working on live components, in particular on electrical switchgear or on high-voltage component, wear special protective clothing according to IEC 61482.

Safe handling of Substances of Very High Concern pursuant to the REACH regulation (Registration, Evaluation, Authorization and restriction of CHemicals): We recommend wearing protective gloves at all times in order to reduce risk when working.

TIM-ID: 0000040531 - 013

2.4 Safety regulations for commissioning and operation of electronic products

Safety regulations for commissioning

Install the product correctly and carry out acceptance in accordance with the manufacturer's specifications before putting the product into service. All necessary approvals must be granted by the relevant authorities and all requirements for initial startup must be fulfilled.

Whenever the product is subsequently taken into operation ensure that:
- All maintenance and repair work has been completed.
- All protective devices are in place.
- The power supply (power plug) must always be accessible to allow isolation of the equipment from supply voltage at any time.
- All components are properly grounded. Ground separately by means of a grounding stake as necessary.
- No persons wearing pacemakers or any other technical body aids are present.
- Adequate ventilation of the operating room must be ensured for any operating status.
- The product must be free of any damage, this applies in particular to lines and cabling.
- Protect battery terminals, generator terminals or cables against accidental contact.
- All connections are correctly arranged/assigned, e.g. polarization.

Immediately after putting the product into operation, make sure that all control and display instruments as well as the monitoring, signaling and alarm systems work properly.

Safety regulations during operation

The operator must be familiar with the control and display elements.

The operator must be familiar with the consequences of any operations performed.

During operation, the display instruments and monitoring units must be observed with regard to present operating status, violation of limit values and warning or alarm messages.

Malfunctions and emergency stop

Practice emergency procedures, especially emergency stopping, at regular intervals.

The emergency stop safety function must be triggered at least once a year and checked for function in accordance with the emergency stop test specifications (see (→ workshop manual) or (→ operating instructions)). Furthermore, the class requirements apply and must be observed additionally if necessary.

Take the following steps if any system malfunctions are detected or signaled by the system:
- Inform supervisor(s) in charge.
- Analyze the message.
- If required, carry out emergency operations e.g. isolate the equipment from the power supply.

Contact Service if the root cause of the malfunction cannot be clearly identified.

Operation of electrical equipment

When electrical equipment is in operation, certain components of these appliances are electrically live.

Follow the applicable operating and safety instructions when operating the devices and heed warnings at all times.

TIM-ID: 0000094294 - 002
