

MTU Callosum_MC

Fire-Detecting and Alarm System (FDS)

Page 1/2

The MTU Callosum_MC FDS fire-detecting and alarm system has its own bus system and dedicated signalling units at the control station in accordance with regulations. Linking up to MTU Callosum_MC via a unidirectional data line FDS provides support by facilitating the location of a fire on board ship.

Benefits

AutroSafe Self Verify® increases safety

Detectors are verified every 24 hours

MultiSensor - a combined smoke/heat detector

Text display suitable for full darkness operation

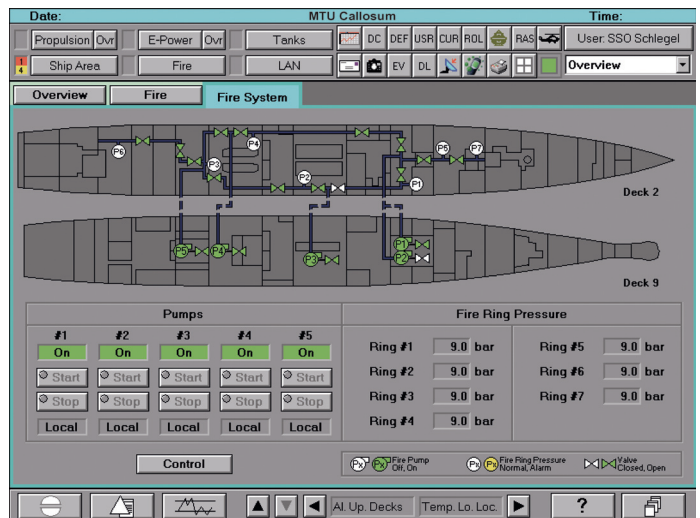

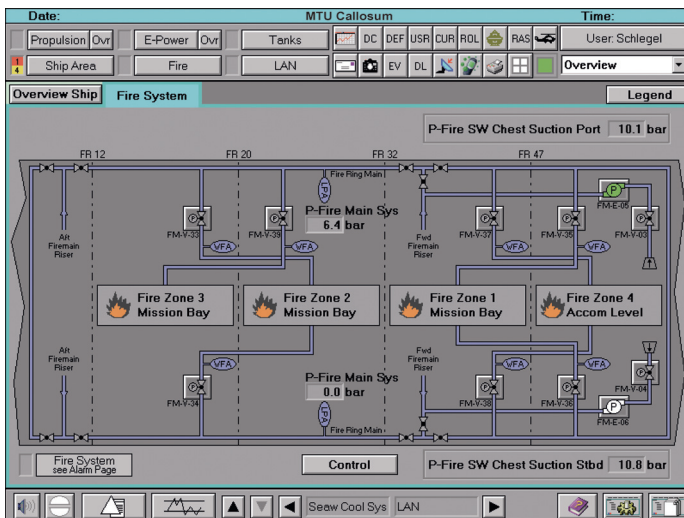

Project specification adaption

Simple and intuitive operation

Avoidance of false alarms

Visualization example: Operator station

Power. Passion. Partnership.
