

MTU Callosum_MC

Machinery Telegraph System (MTS)

Page 1/2

The MTU Callosum_MC MTS is an autonomous system which transmits commands relevant to the propulsion plant, e.g. from bridge to the machinery control room and the engine room.

Benefits

- Microprocessor control
- Data transmission via data bus
- Common hardware for master and slave panels
- Operation via membrane keyboard
- Combined display system (excellent legibility even under extremely unfavourable lighting conditions)
