Table of Contents

1	Preface		
1.1	Notes on the validity and use of the Preservation and Represervation Specifications	4	
1.2	Safety instructions for handling preservatives	6	
1.3	Notes on preservation and represervation	7	
2	Check Sheets for Preservation and Represervation		
2.1	Check sheet for preservation and represervation of Series 500 engine-generator sets	9	
2.2	Check sheet for check of preservation/storage	11	
3	Approved Preservatives		
3.1	Preservatives – Requirements	12	
3.2	Corrosion Inhibitor for Internal Preservation	13	
3.2.1	Corrosion inhibitors for oil chamber and combustion chamber	13	
3.2.2	Coolant circuits with and without corrosion inhibitor	14	
3.2.3	Corrosion inhibitor for the fuel system	15	
3.3	Corrosion inhibitors for external preservation	16	
3.4	Corrosion inhibitor for non-engine components	17	
4	Represervation Intervals		
4.1	Engine-generator set – Represervation intervals	18	
4.2	Dependency between storage conditions and type of packaging	22	
4.3	Represervation intervals for non-engine components	23	
5	Preservation and Represervation		
5.1	Preface	24	
5.2	Service interruption of engine-generator set for more than two months	25	
5.3	Non-engine components – Service interruption of more than 2 months	27	
5.4	Special measures during operational interruption	29	
5.5	Return to operation	30	
5.6	Represervation	31	
6	Depreservation		
6.1	Instruction sheet for de-preservation of mtu products in climate-compatible packaging	32	
7	Packaging		
7.1	Types of packaging	33	
7.2	Climate-Compatible Packaging - Check and Monitoring	35	
7.2.1	Humidity indicator	35	
7.2.2	Climate-compatible packaging – Check and repair	37	
7.2.3	Monitoring Sheet for mtu products with climate-compatible packaging	38	
8	Exhaust aftertreatment system - preservation and re-preservation		
8.1	Introduction	39	
8.2	SCR System	40	
8.2.1	Preservation, represervation and return to operation of the SCR system	40	
8.3	Gas engine-generator sets Series 500 – Catalytic converter	42	
9	Appendix A		
9.1	Contact person/Service partner	43	
10	Appendix B		
10.1	Index	44	

1 Preface

1.1 Notes on the validity and use of the Preservation and Represervation Specifications

Validity of the Preservation Specifications

These Preservation Specifications define the media for preservation/represervation (preservatives) and the guidelines for depreservation and packaging of gas engine-generator sets with Series 500 engines from Rolls-Royce Solutions.

The Preservation Specifications apply to the following products:

- Gas engine-generator sets with Series 500 engines from Rolls-Royce Solutions
 - Gas engine-generator sets stored in reserve
 - Installed gas engine-generator set that have not yet been put into service
 - Gas engine-generator sets in the field with long out-of-service-periods, e.g. normal operational interruptions, out-of-service periods for scheduled maintenance or unscheduled repair work

The preservation / represervation scope is the same for all gas engine-generator sets.

When preserving complete engine-generator sets, the preservation specifications of component manufacturers, e.g. of the generator, must also be observed.

In addition to these Preservation and Represervation Specifications, the respective documentation of gas engine-generator set must also be observed. Work and tests during an interruption of operation and prior to a renewed startup are to be performed according to this documentation.

Other applicable documents

- Documentation of the gas engine-generator set
- Safety data sheets for preservation media
- Current Fluids and Lubricants Specifications

Applicability of this publication

The Preservation and Represervation Specifications are modified or supplemented as required. Before using them, make sure you have the latest version. Before using them, contact Service to make sure you have the latest version of this publication (publication number A001074/..).

Your contact will be happy to help you with any inquiries.

Warranty

Use of the approved preservatives, either under the brand name or in accordance with the specifications given in this publication, constitutes part of the warranty conditions.

The supplier of the preservatives is responsible for the worldwide standard quality of the named products. Rolls-Royce Solutions accepts no liability whatsoever for improper or illegal use of the preservatives which it has approved. Users of the products named in these specifications are therefore obliged to inform themselves of the locally valid regulations.

Important

As the represervation intervals and the medium also depend on the storage conditions and type of packaging, the warranty shall become invalid in the event of incorrect storage or packaging.

These regulations are derived from the manufacturers' specifications, statutory regulations and technical guidelines valid in the individual countries. Great differences can apply from country to country and a generally valid guide to applicable regulations for preservatives is therefore not possible within this publication.

Users of the products named in these Fluids and Lubricants Specifications are therefore obliged to inform themselves of the locally valid regulations. Rolls-Royce Solutions accepts no liability whatsoever for improper or illegal use of the preservatives which it has approved.

Used symbols and means of representation

The following instructions are highlighted in the text and must be observed:

Important

This field contains product information which is important or useful for the user. It refers to instructions, work and activities that have to be observed to prevent damage or destruction to the material.

Note

A note provides special instructions that must be observed when performing a task.

Registered trademarks

All brand names are registered trademarks of the manufacturer concerned.
